

Contents

0.1	List of principle notation	12
I	Linear algebra	13
1	Matrix	15
1.1	Definition and examples	15
1.2	Special matrices	16
1.3	Operations with matrices	17
1.4	Exercises	18
2	Determinant of a matrix	20
2.1	Definition	20
2.2	Applications of determinant	21
2.3	Calculation of higher dimensions determinants	23
2.4	Exercises	25
3	Rank of a matrix	27
3.1	Definition and examples	27
3.2	Step matrix	28
3.3	Exercises	30
4	Linear equations	31
4.1	Definition	31
4.2	The Gauss method	32
4.3	Exercises	35

5	Linear space	37
5.1	Definition and examples	37
5.2	Linear independence	38
5.3	Exercises	40
II	Calculus	43
6	Sequence of numbers	45
6.1	Limit of a sequence	45
6.2	Series of numbers	51
6.3	Exercises	53
7	Limit of a function	54
7.1	Definition and examples	54
7.2	Exercises	57
8	Derivative of a function	58
8.1	Definition and examples	58
8.2	Extremes	63
8.3	Exercises	65
9	Indefinite integral	67
9.1	Definition and examples	67
9.2	Exercises	72
10	Definite integral	73
10.1	Definition and examples	73
10.2	Applications of Riemann integral	76
10.3	Exercises	79
11	Multivariable function	81
11.1	Derivative of a multivariable function	84
11.2	Extreme values of a function of two variables	87
11.3	Extreme values of a function of three variables	89
11.4	Exercises	91

III	Probability	93
12	Probability space	95
12.1	Definition and examples	95
12.2	Examples of defining probability	97
12.3	Conditional probability	99
12.4	Exercises	102
13	Random variable	104
13.1	Definition and examples	104
13.2	Discrete random variable	106
13.2.1	Expected value and variance of discrete random variables	108
13.3	Exercises	111
13.4	Continuous random variables	112
13.4.1	Expected value and variance of continuous random variables	117
13.5	Quantile and kurtosis of a random variable	119
13.6	Exercises	121
14	Random vectors	123
14.1	Definition and examples	123
14.2	Correlation coefficient	126
14.3	Exercises	128
